

Hi. I'm Sam Borick.

Akron, OH | jobs@pepware.io | linkedin.com/in/borick | pepware.io

SUMMARY

I am a full-stack developer. My long history of startups and entrepreneurship helps me build great software, back-to-front. I'm looking for full-time or contract work here in Akron OH or Remote.

SKILLS (Full list on request)

Ionic, Cordova, Phonegap, Android, iOS, Xamarin, Angular, Angular2+, HTML, CSS, SCSS, TypeScript, JavaScript, ASP.NET, .NET Core, C#, API, Golang, Python, C++, SQL, PostgreSQL, PostGIS, AWS, Heroku, DevOps, Terraform, Git, Gitlab, Github, NodeJS, Web Scraping, Ethereum/Solidity

PROFESSIONAL EXPERIENCE

Freelance Software Developer, [Pepware LLC](https://pepware.com), Remote. Aug 2017 – Present

- **Built the Excalibur Auto Body mobile app.** Saved administrator time with photo estimates of vehicle damages. Used Ionic & Golang, deployed on [iOS](#) and [Android](#).
- **Built the Oriana House mobile app.** Provided valuable offline access to critical information for program members. Used Ionic, deployed on [iOS](#) and [Android](#).
- **Automated the ordering process** for [Elite Screens](#). Used Golang & Volusion API, and WebDriver.
- **Gave feedback on software and business model viability** for local small businesses.
- **Designed AutoApp**, a SaaS for building mobile applications for the automotive repair industry. Performed market research and customer interviews. Used Ionic & Golang.

Contract Xamarin Developer, [Virginia Transportation Corporation](https://virginiatransportation.com), Remote. Aug 2018 – Feb 2019

- **Built the VTC mobile app.** Increased driver efficiency by providing process controls and real-time data feedback to operators. Used Xamarin Forms and ASP.NET.
- **Created development roadmap** based on existing codebase to deliver an MVP rapidly & on time.
- **Integrated a new .NET API** with existing legacy .NET API.

Lead Developer, [HungerPerks](https://hungerperks.com), Remote. Jan 2017 – Aug 2018

- **Built the HungerPerks mobile app.** Saved customer's money by providing coupons to local restaurants. Used Ionic & Golang, deployed on iOS and Android.
- **Built the HungerPerks Web app.** Provided restaurants valuable data by asking their customers simple survey questions. Used Angular2+ & Golang, deployed on AWS.
- **Increased customer retention** with improvements to the custom geo-location notification service and simplified coupon redemption flow.
- **Improved login User Experience** by conducting customer interviews and rapidly iterating.

EDUCATION

The University Of Akron, Ohio. Honors in Computer Science.
